

Incidence and Seroprevalence of Avian Influenza in a Cohort of Backyard Poultry Growers, Egypt, August 2015–March 2019

Appendix

Appendix Table. Description of households enrolled in the study

Governorate	No. households	No. subjects (%)	Median no. subjects per household (range)
Fayyoun	86	480 (20.0)	5 (2–17)
Kafr El Sheikh	85	542 (22.6)	5 (1–20)
Qalyubiya	81	486 (20.2)	5 (1–20)
Gharbiya	60	321 (13.4)	5 (1–14)
Sharkiya	78	573 (23.9)	5 (1–20)

Appendix Figure 1. Phylogenetic analysis of the hemagglutinin gene of H9N2 viruses from infected cases (red squares). Those viruses belonged to G1-like viruses endemic in Egypt

Appendix Figure 2. Phylogenetic analysis of the hemagglutinin gene of H5N1 viruses from infected cases (red squares). Those viruses belonged to clade 2.2.1.2 viruses endemic in Egypt
